

MPL 11TM

Technical Specification

Description:

This Mallaghan MPL is a truck mounted (T) platform lift, which has been strategically designed to operate a heavy-duty motorised scissor lift platform for high level work of up to 11m (floor height) around the aircraft.

Make & Model:

Standard commercial chassis - MAN TGL, Mercedes Atego (others on request)

GVW:

10,000kg (upgrade to 12,000kg for increased payload &/or high weight options)

Platform Payload:

600kg (900kg and 1500kg available as options)

Platform Size:

4m x 2m (other sizes upon request)

Maximum Working Height:

11m (floor height)

As Standard:

- Rotating beacon
- Safety guard rails
- Rear access steps

Optional:*

- Platform traverse or extend above driver cab
- Removable handrails**
- Shore power sockets on platform
- Air-line outlets on platform
- Jet-Oil tank and pump system
- Overhead tie off beam

*Option bundles require approval due to restrictions with space.

**Removable handrail options restricted by regulations within individual regions.
